

ACTIVE INGREDIENT: Contains 20g/L mineral oil in the form of a ready-to-use liquid.

PRECAUTIONS:

Avoid contact with eyes and skin. Avoid inhalation of spray mist. Wear gloves when using. Use with adequate ventilation. Wash hands and exposed skin thoroughly after use. Avoid contaminating waterways and fishponds. Do not allow spray to drift onto aquatic environments or outside the target area.

EMERGENCY RESPONSE 0800 CHEMCALL (0800 243 622)

FIRST AID: If contact with skin occurs wash thoroughly with soap and running water, if contact with eyes occurs flush immediately for several minutes with water and call a doctor or the National Poisons Centre on 0800 764 766.

STORAGE & DISPOSAL:

Store in original container with lid tightly closed, safely away from foodstuffs and children. Dispose of container at approved landfill or domestic rubbish collection service.

REFILLING & REUSING:

To make the most of this unique spray bottle you can refill it with Grosafe's **Organic EnSpray 99[®] Spraying Oil**. Fill the bottle with 300ml of water (preferably filtered tap water) and add 5ml of **Organic EnSpray 99[®] Spraying Oil**.

for the control of mites, aphids,
thrips, scale, mealybugs, whitefly,
powdery mildew & botrytis.

300ml

READY-TO-USE SPRAY

treats
9m²

Organic Enspray 99[®] Insect Oil is a ready-to-use insect spraying oil for the control of mites, aphids, thrips, scale, mealybugs, whitefly, powdery mildew and botrytis in all ornamentals, roses, fruit trees and indoor plants. Not recommended for use on palms and ferns. **NIL WITHHOLDING PERIOD**

DIRECTIONS: Commence spraying at first sign of insects or disease. Repeat at 14 day intervals if required. Ensure full coverage of all leaf surfaces, in particular the underside. Do not spray in the heat of the day or when the soil is dry and plants are under moisture stress.

1. Shake bottle well before use and maintain periodic agitation during use.
2. For **initial use**, pump spray trigger approximately 5 times to pressurise bottle and load spray chamber. Mist will disperse when enough pressure is achieved.
3. Pump as desired for required spray volume and ensure complete coverage on all leaf surfaces including undersides of vegetation.
4. For a 2-3 second continuous spray, quickly pump the trigger to increase pressure in bottle. This allows you to hold the base of the bottle and turn it to easily spray the underside of the leaves. NB: Always hold bottle upright when pumping trigger to avoid drawing air.

GENERAL INFO: It is preferable to spray when drying conditions are good, although avoid the midday sun. Do not use within 14 days of any sulphur sprays. Bottle can be reused, please refrain from using powder/granular formulations as the particles may block the nozzle.
